## 1. INTRODUCTION

In the eastern opening of Krum Bay, St. Thomas, there are about 17 abandoned vessels. These vessels are in a heavy wastage state, and Hurricanes Irma and Maria caused metal debris to break off some vessels. The island's public water supply intake pipes are approximately 100 meters away from these derelict vessels, so stopping continued degradation of the vessels is a priority. The solution found to combat the degradation and return the area to its original Waterfront Industrial use is to remove the vessels and debris from the area. The Department of Natural Resources invites you to tender for the removal and disposal of the wreck and debris from its current position.

Figure 1 and Figure 2 below show the wreck. Note that the two tug boats that appear atop the wreck, the WITPOWER AND WITSERVICE, have already been removed.

## 2. WRECK DETAILS

### 2.1. WRECK LOCATION

The wreckage is located on the eastern edge of Krum Bay, St Thomas; along the bank of Regis Point. The approximate wreck coordinates are 18 deg 19.724'N; 64 deg 57.623' W.

## 2.1. WRECK SITE

The wreckage area is a mix of sand and rock bottom type. Some soft sponges are present around the wreckage area. The wreck site is also in proximity to a navigable channel for vessel entering and exiting Krum Bay. This channel must be left accessible throughout the project duration.

### 3. TENDER SCOPE OF WORK

The tenderer is invited to submit an in-depth technical wreck removal solution for all the vessels, including all debris and pollutants within a 50' radius away from the vessel's extent, and to 10' above the mean high-water shore line. If a portion of one of the below listed vessel is partially outside the stated extents, the entirety of the vessel should still be removed. The selected contractor will be responsible for the removal, transport, and disposal of all regulated and non-regulated materials. The wreck removal and subsequent disposal is to be in accordance with all local regulations. It is the tenderer's responsibility to obtain all necessary permits and disposal certificates for the entirety of the wreck removal operation.

The wrecks are in various conditions. However, in general, all wrecks are in a state of heavy wastage. No structural drawings are available for the wrecks. An outline of each wreck along with its approximate dimensions are shown below.

## **4. TENDER REQUIREMENTS**

### **4.1. METHODOLOGY**

Tenderers should provide their methodology for removal of each vessel. Calculations, plans, and drawings to support methodology should be submitted as well where necessary. These should include a demonstration of the tenderers' ability to perform the operation as proposed, such as meeting necessary lifting forces and fulfilling vessel stability. Tenderers should also demonstrate that they will completely comply with all rules, regulations, and requirements of the local governing body and authority for the duration of wreck removal operations. The methodology must allow for continued access for small vessels into the marina and must not block the power plant dock from other vessel traffic.

### **4.2. CRAFT, PERSONNEL, AND EQUIPMENT**

A list of the proposed craft, personnel, and equipment (including subcontractors) for the operations should be included. For each proposed craft, the particulars should be included as well as information about mooring and other capabilities. The personnel list, accompanied by an organization chart, should identify key personnel's role in the operation.

The US Virgin Islands are outside of the US customs zone; therefore, tenderers will need to import and export any equipment from outside of St. Thomas as per the regulations.

### **4.3. ENVIRONMENTAL CONSIDERATIONS**

Details of a pollution minimization and prevention strategy to be followed for the duration of the operation should be included. The tenderer is responsible for all pollution disposal and should include a plan to remove all pollutants, wreckage and debris in the 50' radius area and wreckage extent zones.

### **4.4. DISPOSAL**

Tenderer shall identify where the vessels and debris will be disposed of. Proposed transportation plans, including storage of any pollutants and hazardous materials should be included. Contractor is responsible for handling, transport and disposing of all regulated and non-regulated materials found during the operation, including hydrocarbons and floatables.

#### **4.5. INSURANCES**

Tenderers shall provide the following insurances:

- a) property insurance on its equipment and other property if any (including that of its personnel);
- b) workers compensation insurance, extended to cover the LHWCA and OCSLA, as applicable;
- c) maritime employer's liability insurance, with minimum limits of \$ 10,000,000 per occurrence; and
- d) marine general liability insurance, including contractual liability insurance, with the watercraft exclusion deleted and minimum limits of \$ 10,000,000 per occurrence.

#### **4.6. TIMESCALE**

Tenderers should include a timescale of their proposed plan in the form of a Gantt or bar chart. This timeline is to include a breakdown of all phases of the operation such as mobilization, wreck removal, additional debris removal, disposal, and demobilization. Tenderers should also identify weather conditions or other items that could potentially delay the operation.

#### **4.7. PRICE**

A final, fixed lump-sum total price (in USD) for the proposed operations should be quoted. This lump sum is the price for the safe and complete wreckage removal and disposal to the identified/appropriate landfill including all regulated and non-regulated debris, as well as any local taxes and permit costs.

#### **4.8. PREVIOUS WORK**

Tender must submit examples of previous similar projects with their tender. Previous projects should include work of similar magnitude, technical difficulty, and work in St Thomas or a nearby similar island.

#### **4.9. SURVEYS**

The survey data and condition of the wreckage provided is not guaranteed. It is the tenderers' own risk to accept this. Any site resurveys can be arranged by the tenderer at their own expense. If the tenderer chooses to resurvey, they are to notify the Department of Planning and Natural Resources contact, as identified.
